

# GOTO

## Introducing **GOTO AETHERIOS**

### ◆ **Extremely small, lightweight, and easy to set up**

It is 280mm (11inch) diameter, 18kgs (40lbs) and can even be used for outreach and mobile planetariums.

### ◆ **A realistic sky and full hybrid capability at an affordable price**

Available for domes up to 12m (40ft): Bright sharp stars (9500 stars down to 6.55 mag.), 3 million stars in Milky Way, 117+ Deep Sky objects, Variable stars and more.

### ◆ **Flexible control**

Fully controllable through the control panel, software programming, tablet device, or any combination.

### ◆ **GOTO quality**

Same quality and craftsmanship as the GOTO projectors for larger domes.
